10 A herd of cows are being held in a field on a rainy day. One of the cows has a wound on its rump

12	An animal has been diagnosed with ringworm.	
	Explain <b>two</b> actions to safely dispose of the animal's bedding.	(4 marks)
13	Explain <b>two</b> requirements of an emergency plan for dealing with a fire in a building the animals at a wildlife park that is open to the public.	nat houses (6 marks)

14	Animals kept in zoos are regularly weighed as part of their health monitoring. In order to minimise stress, large mammals are trained to walk onto a weighing platform.
	Explain how positive reinforcement can be used in operant conditioning to train the large mammals to be weighed. (6 marks)

## **Section B**

15	An adult dog at a rescue centre has recently been diagnosed with the bacterial infection, salmonella, which has resulted in weight loss. The dog is vomiting, has diarrhoea and is lethargic. The dog is currently undergoing veterinary care and treatment.
	Analyse how salmonella affects the digestive system of the dog. Justify the actions the rescue centre need to undertake to maintain the health of the dog whilst it is in isolation and being treated for the bacterial infection. You are not expected to discuss the veterinary medicine prescribed.  (12 marks)

16	A farm adventure park that offers bird of prey flying demonstrations and small mammal handling, has a confirmed case of the notifiable disease, avian influenza. The aviaries are located in a separate area at the back of the park.		
	Analyse the implications an outbreak of avian influenza on the business. Justify the control measures needed to prevent the spread of disease to maintain the health of all other animals on the premises.		
	(12 marks)		

17	A severe thunderstorm has been forecasted to arrive in the next three days, bringing a risk of strong winds and flooding to both a donkey sanctuary and the surrounding area. This means the sanctuary may be inaccessible for staff, deliveries and collections for the duration of the storm and the following days. The storm may also cause disruptions to the sanctuary's power supply. There is no suitable transport available to move the donkeys offsite, therefore, a minimal number of staff will be required to stay in onsite accommodation during the storm due to the predicted inaccessibility of the sanctuary.
	Analyse the hazards to the staff remaining onsite throughout the storm. Justify recommended measures to ensure the ongoing care of the donkeys during the period of inaccessibility.
	(12 marks)
