Apply skin tanning techniques

Skin tanning is a popular salon treatment. It achieves an instant result and clients leave with a healthy, natural-looking glow. You will learn how to apply self-tanning products to the lower legs, arms, shoulders and face; ideal for clients who need a bit of colour for a special occasion such as a wedding. You will consult with the client, identify contra-indications, carry out a sensitivity test and recommend the best type of treatment – be it manual application or spray application – and apply the product to the client's satisfaction. You will learn about the effects of the sun's rays and methods to use to protect the body, as well as the various products available and the effects of these products on the skin.

Assignment mark sheet

Unit 223 Apply skin tanning techniques

Your assessor will mark you on each of the practical tasks in this unit. This page is used to work out your overall grade for the unit. You must pass **all** parts of the tasks to be able to achieve a grade. **For each completed practical task, a pass equals 1 point, a merit equals 2 points and a distinction equals 3 points.**

What you must know	Tick when complete
Task 1a: produce a report	
Task 1b: produce a fact sheet	
Task 1c: anatomy and physiology	
Or tick if covered by a GOLLA online test	

What you must do	Grade	Points
Task 2: provide self-tanning service

What does it mean?

Some useful words are explained below

Aftercare advice

Advice given to the client following a skin tanning treatment in order to maintain the tan and prevent any adverse reactions.

Image courtesy of naturasun

Compressor

An electrical piece of equipment that forces the liquid tanning product out of the spray gun.

Contra-action

An unfavourable reaction that may occur either during or after the treatment, eg skin swelling.

Contra-indication

A condition that may restrict the treatment being carried out, eg dermatitis.

Desirable characteristics

The appropriate conditions that are needed to carry out a skin tanning treatment such as warmth, ventilation, privacy and music.

Dihydroxyacetone (DHA)

An ingredient in tanning products, which often comes from plant sources such as sugar beet or sugar cane.

Exfoliation products

Abrasive products used to remove the top layer of the epidermis.

Malignant melanoma

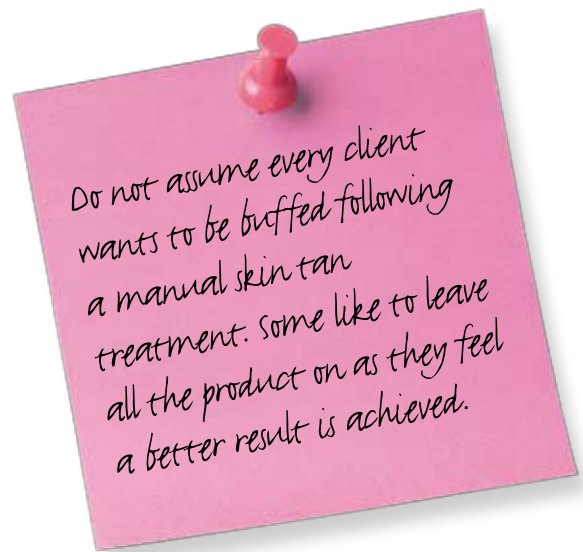

A form of skin cancer which develops from a mole.

Image courtesy of www.hiveofbeauty.com

PPE

Personal protective equipment that should be used during the treatment, such as disposable gloves or a face mask.

Revision tip

Test the spray gun by aiming on to a piece of tissue prior to using on the client's skin to check the flow of the product.

Follow in the footsteps of... *Samantha Raybould* “

After studying Beauty Therapy for two years Samantha worked in a salon where tanning was the most popular treatment. She left to run a salon in a Greek hotel, which offered a wider variety of treatments. Six months later Samantha moved to Antigua to work in a spa, where she learnt a great deal about client care and working with clients from different cultures. She then returned to the UK to do a Beauty Therapy Management course. Samantha is now a lecturer at Aberdeen College, and towards the end of her third year of teaching she was temporarily promoted to Curriculum Leader for Beauty Therapy. **Look for the pink quote marks to see what she has to say to you!**

What you must know

You must be able to:

- 1 describe salon's requirement for client preparation, preparing themselves and the work area
- 2 identify different consultation techniques used to identify treatment objectives
- 3 describe the factors that need to be considered when selecting techniques, products and equipment
- 4 describe the environmental conditions suitable for self-tanning treatment
- 5 describe the safety considerations that must be taken into account when providing self-tanning treatment
- 6 identify the range of equipment used for self-tanning treatments
- 7 identify products used and their key ingredients
- 8 compare the benefits and effects of self-tanning treatments with UV tanning treatments
- 9 explain the importance of regular disinfecting and sterilising of equipment between self-tanning sessions
- 10 explain the effect self-tanning products have on the skin and the reasons the effect has limited duration
- 11 describe contra-indications that prevent or restrict self-tanning treatment

Continues on next page

- 12 describe how to communicate and behave in a professional manner
- 13 state the importance of positioning yourself and the client correctly throughout the treatment
- 14 describe safe and hygienic working practices
- 15 describe contra-actions which might occur during and following the treatment and how to respond
- 16 describe the aftercare advice that should be provided
- 17 state the importance of completing the treatment to the satisfaction of the client
- 18 state the methods of evaluating the effectiveness of the treatment
- 19 describe the structure and function of the skin

Fake tan contains dihydroxyacetone (DHA), which stops the tan from going orange on application.

Revision tip

Make sure the client is properly exfoliated, especially around dry areas such as ankles, knees, elbows, wrists and knuckles.

It's important to make clients aware of the harmful effects of the sun.

Image courtesy of United Beauty

SKIN TO

Dilute the tanning lotion with moisturiser when working on areas that need to be lighter, such as the wrists, the backs of the hands and the hairline.

Image courtesy of Germaine de Capuccini

Make sure the spray gun is used at a 90° angle or keep your wrist straight.

anning

“

Always look at the client's natural skin colour. If there is a choice, adjust the product to avoid the tan looking unnatural.

What you must do

Practical observations

This page shows what you need to do during your practical task. You can look at it beforehand, but you're **not** allowed to have it with you while carrying out your practical task. You must achieve **all** the criteria; you can achieve 1 mark, 2 marks or 3 marks for the criteria indicated with *****.

- 1 Prepare yourself, the client and the work area for self-tanning treatment
- 2 Use suitable consultation techniques to identify treatment objectives *
- 3 Identify influencing factors
- 4 Provide clear recommendations to the client *
- 5 Advise the client on how to prepare for the treatment
- 6 Position yourself and the client correctly throughout the treatment
- 7 Follow health and safety working practices
- 8 Communicate and behave in a professional manner
- 9 Select and use products and equipment taking into account identified factors *
- 10 Complete the treatment to the satisfaction of the client *
- 11 Record and evaluate the results of the treatment with the client
- 12 Provide suitable aftercare advice *
