**Letter of support for City & Guilds Level 2 Diploma in Electrical Installations  
(Buildings and Structures) 600/5498/0**

The Institution of Engineering and Technology (IET) as a professional industry body in the Engineering and professional recognition sectors, believes the following qualification meets industry needs and would give a young person, aged 16-19, studying full time relevant skills and knowledge to prepare for employment in the industry.

We consider that the qualification will give the young person an advantage in seeking employment within the sector and/or progressing onto further study, such as City & Guilds Level 3 Diploma in Electrical Installations or an apprenticeship leading to an electrical installation occupation.

We support the following qualification as a Technical Level for inclusion in the DfE Performance Tables:

**City & Guilds Level 2 Diploma in Electrical Installations (Buildings and Structures)  
600/5498/0**

We give permission to City & Guilds to publish this letter of support and our logo on its website.

Yours sincerely

Richard Townsend CMS, MIET

Senior Electrical Engineer  
Standards and Compliance  
The Institution of Engineering and Technology
