

6035/6189/2365 RPL FROM 7202

Learners who have achieved the 7202 may have prior certificated units that contain evidence of tasks that can be recognised against 6189/6035/2365 practical tasks. This will be at the assessor's discretion who will ensure knowledge and skills are still current.

The below mapping allows candidates to RPL their evidence into 6189/6035/2365 (H&S only) for the **practical tasks only**. Therefore candidates would be exempt from having to repeat these practical activities. All other assessments must be completed to achieve and claim the relevant unit. The learning that has been recognised will allow candidates to progress and build on skills already learned without repeating learning that they have already been assessed against.

*NB Candidates can only RPL into task E1 and E3 if they have completed the 105 unit from the Electrical pathway in 7202.
