

**QUICK GUIDE TO GAS SAFE REGISTER COMPETENCE CATEGORIES**

The following tables indicates those Gas Safe Register Competence Categories contained within the Nationally Accredited Certification Scheme for Individual Gas Fitting Operatives (ACS) that, on successful COMPLETION of the listed Qualifications, the successful Learner will be deemed to hold at least an 'equivalent to' on Gas Safe Registers 'National Operative Competence Database'.

The results of successful completion will be automatically uploaded by City & Guilds to Gas Safe Registers 'National Operative Competence Database'.

The successful Learner s Qualification Certificate may not indicate these ACS Category's nor will it state that the Learner has completed these ACS Assessments.

This database is also different from the 'Gas Business Registration Database' that is operated by Gas Safe Register for the purpose of mandatory registration to comply with Regulation 3(3) of the Gas Safety (Installation & Use) Regulations.

To comply with Regulation 3(3) each individual or their employer must apply for Business Registration with Gas Safe Register. Gas Safe Register will then utilise the 'National Operative Competence Database' to determine what work categories will be issued on a registered operatives Licence Card.
