

Important information regarding Refrigeration, air-conditioning and heat pump examinations within 6090 and 7189.

We wrote to you earlier this year to let you some of our examinations had been taken offline to carry out quality reviews. We are now able to confirm the following:

6090-502

This examination has been reviewed and is now available to book through Walled Garden. As part of the review, some of the questions ask candidates to use an A3 psychrometric chart and Ph chart. Centres must ensure that candidates are provided with these resources ahead of the examination. These can be found on the 6090 webpage, under the document tab > Level 2 > Examinations.

6090-204

This examination has been reviewed and is now available to book through Walled Garden.

7189 examinations

Based on the amendments we made to the 6090 examinations we have reviewed the performance of the Level 2 examinations within the 7189 and reflected the changes made in 6090 to ensure these two qualifications remain comparable and consistent. Changes have been finalised on the 7189-202, this is now available to book through Walled Garden. Changes to the 7189-203 are being finalised and will be available shortly.
