Assignment B

About City & Guilds

City & Guilds is the UK's leading provider of vocational qualifications, offering over 500 awards across a wide range of industries, and progressing from entry level to the highest levels of professional achievement. With over 8500 centres in 100 countries, City & Guilds is recognised by employers worldwide for providing qualifications that offer proof of the skills they need to get the job done.

City & Guilds Group

The City & Guilds Group includes City & Guilds, ILM (the Institute of Leadership & Management) which provides management qualifications, learning materials and membership services, NPTC which offers land-based qualifications and membership services, and HAB (the Hospitality Awarding Body). City & Guilds also manages the Engineering Council Examinations on behalf of the Engineering Council.

Equal opportunities

City & Guilds fully supports the principle of equal opportunities and we are committed to satisfying this principle in all our activities and published material. A copy of our equal opportunities policy statement is available on the City & Guilds website.

Publications

City & Guilds publications are available on the City & Guilds website or from our Publications Sales department at the address below or by telephoning +44 (0)20 7294 2850 or faxing +44 (0)20 7294 3387.

Every effort has been made to ensure that the information contained in this publication is true and correct at the time of going to press. Level 2 Principles of ICT Systems and Data Security (7540-011)

Assignment B

Level 2 Principles of ICT Systems and Data Security (7540-011)

Introduction – Information for Candidates

About this document

This assignment comprises all of the assessment for Level 2 Principles of ICT Systems and Data Security (7540-011).

Health and safety

You are asked to consider the importance of safe working practices at all times.

You are responsible for maintaining the safety of others as well as your own. Anyone behaving in an unsafe fashion will be stopped and a suitable warning given. You will **not** be allowed to continue with an assignment if you compromise any of the Health and Safety requirements. This may seem rather strict but, apart from the potentially unpleasant consequences, you must acquire the habits required for the workplace.

Time allowance

The recommended time allowance for this assignment is **2.5 hours**.

Level 2 Principles of ICT Systems and Data Security (7540-011)
Candidate Instructions

Time allowance: 2.5 hours

Assignment set up:

This assignment is made up of **three** tasks:

- Task A – Common threats to IT Systems and Data

- Task B – Protection of IT Systems and Data

- Task C – The meaning of Cryptography and its successful application to ICT Systems and Data.

Scenario

You are a Technical Apprentice in a company that provides home-based technical support to individuals and home workers.
The company's current marketing campaign is aimed at helping secure PCs and home Networks.
You have been tasked with providing accurate and up-to-date information on the security of IT Systems and Data, which will be included in "Fact Sheets" for distribution to the target market.

Your information will be included in three fact sheets:

Task A: Fact Sheet 1: Common threats to IT Systems and Data

Task B: Fact Sheet 2: Protection of IT Systems and Data

Task C: Fact Sheet 3: The meaning of Cryptography and its successful application to ICT Systems and Data.

It is crucial that the explanations and examples you provide, as far as possible, use "non technical" language, in order to be more easily understood by the intended audience.

You may provide the required information in a format of your choice however you should note that you are NOT being asked to produce a leaflet – that is the marketing department's job.

Task A – Identify and explain common threats to IT Systems and Data
Please use the Answer Sheet provided to complete Task A.

1	Identify and briefly describe the consequences of **seven** common physical threats to ICT systems and data including hardware damage, loss and theft eg • deliberate damage to hardware or equipment • inadequate physical security • loss or theft due to size or portability of devices • accidental damage to hardware or equipment
2	Identify and briefly describe the consequences of the following types of malicious code: • Virus • Trojan • Logic bomb • Worm • Spyware.
3	Identify and briefly describe the consequences of **six** other electronic threats to ICT systems and data.
4	List **three** of the security vulnerabilities associated with remote access technologies, including wireless.

Task B – Identify and explain ways of protecting ICT Systems and Data
Please use the Answer Sheet provided to complete Task B.

1	Identify and briefly explain the function of physical access control and security for ICT systems including: • locks (hardware locks and entry locks) • biometric controls (fingerprint and voice recognition) • CCTV • fire control systems • Shielding (cable screening).
2	Identify and explain ways of providing electronic protection and security controls for any **six** of the following: • firewalls • virtual networks • secure connection/transfer protocols • wireless connection security • login and password protection • access rights and permissions (including limiting data access) • virus, malware and spyware protection • secure remote access • backup and restore systems.
3	Identify and give examples of **three** characteristics of strong passwords.

Task C – Identify and explain the application of Cryptography to ICT Systems and Data

Please use the Answer Sheet provided to complete Task C.

C1	State **two** methods for applying cryptography to ICT systems and data security.
C2	State how Public Key Infrastructure (PKI) operates.

When you have finished working:

- Sign each document above your name and label all removable storage media with your name.
- Hand all paperwork and removable storage media to your assessor.

If the assignment is taken over more than one period, all paperwork and removable media must be returned to the test supervisor at the end of each sitting.

End of assignment
