Assignment A & B

Introduction – Information for Marking Assessors

About this document

This assignment comprises all of the assessment for Level 3 Improving productivity using IT (7574-301).

The task information for this assignment is contained in the *Candidate Instructions* document. The following notes for guidance are provided to assist assessors in planning the delivery of the assignment to candidates.

Important information

This document must **not** be shown to candidates prior to assessment.

Feedback **may** be given to candidates after the assessment using this document, but they must not be allowed to keep a copy.

Health and safety

The importance of safe working practices, the demands of the Health and Safety at Work Act 1974 (HASWA) or national and / or local health and safety regulations, associated regulations and Codes of Practice associated with the particular industry, must always be stressed. This will include directives from the European Union (EU) where appropriate. Candidates have responsibilities for maintaining the safety of others as well as their own. Anyone behaving in an unsafe fashion must be stopped and a suitable warning given. A candidate should never be allowed to continue on an assignment if they have contravened these requirements. This may seem rather strict but, apart from the potentially unpleasant consequences, each candidate must acquire the habits required for the workplace.

Location of assignment

Any suitable environment.

Equipment required for this assignment

It is assumed that candidates will be working on a Network system in which case they will have a Home directory and read access to an area from which assignment information (files and directories) can be read. If stand-alone computers are used, the assignment details can be placed on the fixed disk, and the candidate files stored on removable storage media.

Evidence and recording

Centres should ensure that all data produced by candidates is kept secure and that assignments are, once downloaded, kept locked safely away until their use. It is the responsibility of the centre/assessor to ensure that the candidate taking an assignment /test is the correct person. Ideally, centres should produce a written strategy outlining their procedures for ensuring the above takes place.

Security

Centres should ensure that all data produced by candidates is kept secure and that assignments are, once downloaded, kept locked safely away until their use. It is the responsibility of the centre/assessor to ensure that the candidate taking an assignment /test is the correct person. Ideally, centres should produce a written strategy outlining their procedures for ensuring the above takes place.

Time considerations

Recommended time allowances have been allocated for each assignment; however they do not form part of the marking criteria, and are for guidance purposes only. However, if you feel that a candidate requires extra time to complete the assignment this is at the discretion of the Assessor.

It is recommended that the candidates should complete this assignment within **two and a half hours**.

If the assignment is taken over more than one period, all removable media and paperwork must be returned to the test supervisor at the end of each sitting.

A period of seven days must have elapsed before an unsuccessful candidate can retake this assignment.

Files to be provided by the centre

This unit has been designed to be used in conjunction with any other unit which is being assessed using 7266/7574 assignments. This will enable the candidate to achieve two units. For example; a candidate completes the assignment for 7266-042 Designing and producing documents and templates and completes this assignment alongside it. The candidate is then awarded **both** 7574-301 and 7574-329.

Prior to the start of this unit the candidate will need to be given the scenario from the linked unit to enable the planning stage to be carried out.

	For Task	File specification	Type	File name
1	A	Scenario from an assessment to be completed by the candidate eg Designing and producing documents and templates assignment A		
2	B	A completed assessment using the same assignment as selected for Task A (a suggestion is that centres use the worked copy provided)		
3	A, B, C	Answer Sheet	.rtf	Answer Sheet.rtf

A selection of worked examples are available from our website.

Marking and grading criteria

How to mark this assignment

All candidate instructions are shown for ease of marking. A mark should be given for each task specified in the marking, if the candidate achieves it. At the end of the marking criteria candidates' marks should be totalled and an overall grade should be given according to the prescribed number of criteria shown. Use all available evidence to support the awarding of marks including electronic files, printouts etc. The Evidence and Recording column is shown as a suggestion.
