

## Use of video evidence in Engineering and Maintenance T Level assessment

Throughout the Engineering and Maintenance T Level occupational specialism assessments, there is reference to occasions where video evidence can be used as an additional form of evidence to support assessor judgements.

The videos linked below have been developed as exemplar materials for the 8713 T Level Technical Qualification in Engineering, Manufacturing, Processing and Control: Machining and toolmaking occupational specialism. They reflect the type of videographic evidence that would be demonstrated for candidates demonstrating a level of threshold competence and a distinction level for Task 3c.

These videos are to be used as exemplars only, and act as additional evidence that assessors should consider this evidence alongside the other evidence demonstrated in the GSEM for this task.

### Machining and toolmaking – exemplar videos for Task 3c

Threshold competence: [here](#)

Distinction: [here](#)

These materials are reflective of the level of evidence that would be expected for similar videographic evidence across the other Engineering and Maintenance T Levels.
