To Roberta Podavitte

I provide my support as an employer representative within the Health and Social Care Sector, as I agree the following qualifications

- meet the industry needs
- would give a learner the relevant skills to gain employment and are currently used as the industry/sector standard and as the main qualification within health and Health and Social Care apprenticeship frameworks
- develop and confirm specialist knowledge and skills which are relevant to the sector/occupation
- may give the young person an advantage when applying for a job, or progressing into higher education.
