

Unit 305: Sustainability in professional kitchens

Activity 3: WRAP (Waste Resources Action Programme)

WRAP is a UK programme acting as a catalyst for positive economic and environmental action. They work to bridge the gap between governments, businesses, communities and individuals – forging partnerships and delivering initiatives to support more sustainable economies.

Their priority sectors are:

- Food and drink
- Clothing and textiles
- Plastics

Their focus is on maximising the value of waste by increasing the quantity and quality of materials collected for re-use and recycling.

- 1) Visit the WRAP website to research further:
www.wrap.org.uk/about-us/what-we-do
- 2) Can you find similar initiatives for your own/a different country?
