20th May 2015

Dear Patrica

City & Guilds Automotive Qualification Routes.

I am writing in support of the below qualification that City & Guilds has developed in consultation with the retail motor industry.

600/1177/4 Level 2 Certificate in Light Vehicle Maintenance and Repair Principles

As a leading national work based provider offering apprenticeships and qualifications to local and national employers, it is vital we invest in the workforce of the future through a qualification progression route.

We believe that this qualification listed above offers the following benefits:

- It is recognised within industry nationally.
- Allow learners to work to their own ability and show progression to different levels.
- Equips learners with essential knowledge and skills required to work as a light vehicle maintenance technician.

Upon completion of this introductory qualification learners will be able to progress successfully into the following qualification which allows them to start the intermediate level apprenticeship in maintenance and repair for light vehicle:

500/9707/6 Level 2 Diploma in Light Vehicle Maintenance and Repair Principles

If the intention is to continue training at college, learners could progress into the 501/0019/1 Level 3 Diploma in Light Vehicle Maintenance and Repair Principles.

Yours sincerely,

Graeme Warne,
